

CS411W Weekly Report

Team Bronze

Performance Period: April 8th -> April 15th

1. Summary of Group Accomplishments:

- Lab 2 Section 3
- Pantry page is (almost) fully functional. (just need searching)
- Established final form of recall/pantry page and begun the changes.

2. Individual Contributions/Accomplishments: (to be filled out by each individual)

- **Parker D.:** Calling recalls data from FDA, Began work on an admin panel, and database updates.
- **Mark:** Updated Team Website with new deliverables and presentation
- **Jackie:**
- **Parker M.:** Updates to recall page to show personalized recalls
- **Shan:** Calling Openfoodfacts API, parsing data, and adding it to the database whenever unknown UPC is given.
- **Josh:** Updated readme, updated UX to provide user feedback when UPC not found from Openfoodfacts, fixed bug where navbar had fragmented component behavior when used with different pages, added a recall check to new pantry items, added recall email notifications for existing and new pantry items, added stats components to homepage so users can see time based total recall data in addition to a count of current active recalls in their pantry

3. Key Objectives for Coming Week (top level prototype development objectives)

- Get emails working and prepare test emails
- Finish landing page and settings page
- Be able to search pantry page
- Finish FDA API call to database update.

4. Issues/Concerns: Examples below...

- Participation between all group members.
- Time: running low on it.
- Recall grabbing is running behind.
