

CS411 Weekly Report

Team Bronze

Performance Period: February 8th - February 14th, February 22th - February 28th

1. Summary of Group Accomplishments:

- The website has a complete visual overhaul.
- User accounts are working completely now, allowing for dynamic inventory loading.
- User pantries allow the addition and removal of items.
- The database and backend are now switched completely over to using SQLite3 and Prisma.

2. Individual Contributions/Accomplishments: (to be filled out by each individual)

- **Parker D.:** Switched the database to use SQLite. Added the backend for pantry-item additions. Grabbing API calls, just working on parsing now, which is being passed on to others.
- **Mark:** Started work on the database POST and DELETE for the Pantry page. Created basic Homepage layout displaying items.
- **Jackie:**
- **Parker M.:** Designed home page, designed pantry page, created login page. Added login modal to pantry page and recall page. Created a search bar for pantry the pantry page to allow the user to add an item to their pantry. Added a remove feature for pantry items.
- **Shan:**
 - i. Made the project to use Node.js, Prisma, and SQLite.
 - ii. Incorporating front-end design.
 - iii. Made "Login", "Logout", and "Register" pages work and connected to the database.
 - iv. Allow the app to send the email verification to the user's email.
- **Josh:**

3. Key Objectives for Coming Week (top level prototype development objectives)

- Finalizing API calls and data parsing so that databases can be updated automatically.
- Begin work on email notifications.
- Pop-up on log in if there is a recent recall alert for a user.
-

4. Issues/Concerns: Examples below...

- We need to get API setup, so we can continue to develop more functionality based on it. This is the main bottleneck.
-

5. Mentor Meeting Notes:

- He helped us in the switch to Prisma/SQLite.
- We talked about user stories and task management.
- He helped us decide what we should actually be focusing on for Demo 2 and 3 in the limited time we have.
